

# Rawan Shakkah

## Junior Backend Developer

Amman, Jordan | +962-772331013 | rawanshakkah@gmail.com | [linkedin.com/in/rawan-shakkah-](https://www.linkedin.com/in/rawan-shakkah-)

### PROFESSIONAL SUMMARY

Computer Engineering graduate with a background in Python, SQL, object-oriented programming, and web development. Gained practical experience through programming training and personal projects, including developing a RAG chatbot using Python and Flask. Seeking a Backend Internship to apply my programming skills, work on real-world projects, and further develop my backend development experience.

### EDUCATION

**Bachelor's Degree in Computer Engineering - Yarmouk University** | June 2026 (Graduated) | Very Good

### PROFESSIONAL EXPERIENCE

#### Python Programming Trainee – Dot Jordan, Ministry of Digital Economy and Entrepreneurship & UNICEF

- Completed practical training in Python programming, object-oriented programming (OOP), databases, and web development.
- Learned version control concepts and used Git as part of the software development workflow.
- Worked with files and databases and developed desktop applications using Tkinter.
- Developed foundational knowledge of data analysis and AI using Python.

#### Network Engineering Trainee - STS (Specialized Technical Services)

*Feb 2026 - Jun 2026 | Field Training | Amman, Jordan*

- Applied CCNA concepts, including routing, switching, VLANs, IP addressing, subnetting, and network troubleshooting.
- Configured and tested enterprise network scenarios using Cisco Packet Tracer and EVE-NG to validate network connectivity and design.
- Gained hands-on experience with FortiGate firewalls, including security policies, NAT, VPN fundamentals, traffic filtering, and access control.

#### Web Development Trainee – Hisham Hijawi Scientific Incubator, Yarmouk University

- Developed foundational skills in HTML and CSS for creating and styling websites.
- Learned the fundamentals of WordPress and its use in building different types of static and dynamic websites.
- Applied web development concepts through practical training and exercises.

### SELECTED PROJECTS

#### Network Monitoring and Traffic Testing System Using ML | Graduation Project | Yarmouk University

*Python · Machine Learning · Cybersecurity · Streamlit · Network Traffic Analysis*

- Developed a machine learning-based network monitoring and threat detection system using the CIC-IDS2017 dataset.
- Preprocessed network traffic data using data cleaning, feature selection, correlation analysis, PCA, and under-sampling techniques.
- Trained and evaluated Random Forest, SVM, and Multi-Layer Perceptron (MLP) models for cyberattack detection and classification.
- Achieved 98.82% classification accuracy using the Random Forest model on the CIC-IDS2017 dataset.
- Built an interactive Streamlit dashboard for threat detection, attack classification, model performance visualization, and network traffic analysis.

#### RAG Chatbot for Document-Based Question Answering

- Built a RAG chatbot using three PDF documents as a knowledge base for answering user questions.
- Processed and chunked PDF documents and generated embeddings to retrieve relevant information.
- Developed the chatbot in Python and built an interactive user interface using Streamlit.
- Designed the system to generate answers based on relevant information retrieved from the provided documents.

### TECHNICAL SKILLS

**Languages:** Python, C++, C#, SQL

**Backend & Databases:** Flask, REST APIs, OOP, SQL, Relational Databases

**Tools:** Git, GitHub, Linux/Ubuntu, Docker, Streamlit

**AI & Data:** Machine Learning, RAG, Embeddings

**Professional Skills:** Communication, Teamwork, Problem Solving, Analytical Thinking, Time Management
